### **DETAILED ACTION**

This Office action is in response to the amendment filed on 7/3/06. In this amendment, claims 1, 6 have been amended; claims 2, 9, 11, 14, 18 have been canceled and claim 20 has been added. Overall, claims 1, 3-8, 10, 12, 13, 15-17, 19, 20 are pending in this application. The Examiner inadvertently marked "final" in the last office action mailed on 9/18/06, therefore, the last office action is hereby withdrawn; and a new non-final rejection is set forth below.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by Tashiro et al. (US Patent 6,901,747).

Tashiro discloses a system for assisting regeneration of a storage/release NOx trap integrated into an exhaust system of a motor vehicle diesel engine, which includes means for injecting fuel into the cylinders of the engine in the form of at least pilot and main injections and means for controlling the injection means to switch the engine periodically from a standard mode of operation using a lean mixture with one pilot injection and one main injection (see col. 11, lines 19-23), in which NOx are stored in the trap, to a regeneration mode of operation using a rich mixture, with at least two main injections depending on the engine load, in which NOx are

Art Unit: 3748

released from the trap and the trap is regenerated (see Figure 1, col. 11, lines 24-31, col. 17, lines 36-40, col. 19, lines 55-64).

# Allowable Subject Matter

Claims 1, 3-8, 10, 12-13, 15-17, 19 are allowed.

## Response to Arguments

Applicant's arguments filed on 7/3/06 have been fully considered but they are moot in view of the new ground(s) of rejection.

### Conclusion

Any inquiry concerning this communication from the examiner should be directed to Examiner Diem Tran whose telephone number is (571) 272-4866. The examiner can normally be reached on Monday -Friday from 8:30 a.m.- 5:00p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion, can be reached on (571) 272-4859. The fax number for this group is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
